	http://www.ocr.org.uk/i-want-to/download-past-papers/	None required

Apps:

These can be downloaded onto phones / tablets for revision on the move. There may be a small cost for some of these apps. There could also be in-app purchases so you may wish to disable this facility on the device to avoid any extra costs.

Gojimo: This app offers multiple choice questions to practise a range of subjects.

GCSE History: If you're studying GCSE History, this app is a great supplement to your existing study tools. The homepage has 2 tabs; 'Questions' and 'Past Papers'. The content is designed to cover the majority of exam boards.

GCSE Maths (Super Edition): Learn the fundamental aspects of each topic using over 250 revision notes and 2700 questions with solutions and explanations on Number, Algebra, Stats and Geometry. This app provides mock tests of 50 questions randomly selected from the topic.

Revision App: This app is packed with tutor videos and exam revision quizzes for GCSE level students. It covers all the fundamental topics and students have the option to choose the subtopics they want to focus on and can take the appropriate tests for it. Videos will help guide you through topics you find difficult.

Study Tracks: Use this app to aid your recollection and retention of the core syllabus. It's as easy as remembering the lyrics to a song...core knowledge from a range of subjects is put to great music and beats (by an Ivor Novello Award winning producer and songwriter) which sticks in your head. Then test yourself on what you've learned. Great for recall in exams!

There are also a range of apps available to help you set up an online exam schedule and countdown, organise your notes and revision and prepare visual aids for revision such as mind maps and flow charts, You can even find apps that help you sleep! For more info, go to <http://blog.badgerlearning.co.uk/top-gcse-a-level-revision-apps/> which provides information about the top ten GCSE preparation apps for UK students.

Use whatever revision strategies work for you and get as prepared as you can for your exams. But, Make sure you remember that you must also look after yourself properly in the run up to and during the exams. Work hard but make sure you also eat properly, drink plenty of water, get sufficient sleep and build regular breaks into your revision schedule. It will be an intensive few weeks but it will be worth it!

Happy revising! 😊
